Scrum (Sprint 2)

Michael Vincent Dosado

Sprint Planning

- To develop the Front-end of the website

- Learn HTML, CSS, and Javascript

- Look for learning resources, watch lecture/informative videos, and apply learnings

- Add User Stories to product backlog for Sprint 2

- Choose User stories to be actualized/created for the Sprint Goal

Sprint

- Learn HTML, CSS, and Javascript

- Create HTML

- Design HTML by creating CSS files to touch up appearance and fix the lay-out

- Apply Javascript in HTML/CSS

Daily Scrum

- Assess output and decide on possible additional adjustments/features needed

- Assess overall progress by checking on the Sprint Backlog and Sprint Goal

Sprint Review

- Review overall output

- Determine Possible future adaptations by adding new user stories

- Assess Front End aspects of the developed wireframe and Test functionality of the Website.

Sprint Retrospective

- Retrospect on sprint review output and reflect/introspect on what to improve or expect for next sprint.
